FLATLITE® Cove Lighting Solution

Uniquely suited to cove and soffit illumination: flat, flexible FLATLITE® lamp is the only solution for perfectly consistent, energy efficient lighting.

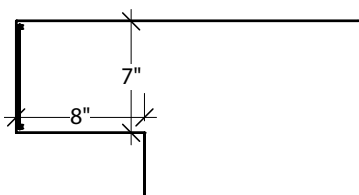

Up to 300 feet of continuous light from a single connection, with no loss of luminance.

Plus, the ability to locate the power supply up to 400 feet away from the lamp!

FLATLITE® Photometrics

Never originally intended to be a source of illumination, FLATLITE lamp does produce enough lumens to provide plenty of near field effect in low to medium ambient light environments. Not recommended for atrium lighting when an effect is required in daylight.
